Biswas, G, 319-322
Cappelle, B, 307-318
Cooper, GF, 283-306
D'Ambrosio, B, 233-260
Da, R, 307-318
De Cooman, G, 307-318
Downs, T, 89-158
Dubois, D, 1-21, 23-46, 419-449
Fan, LT, 69-85
Kerre, EE, 307-318
Kruse, R, 47-68
Laskey, KB, 261-282
Lee, ES, 159
McCahon, CS, 159-181
Mithani, R, 69-85
Paris, JB, 183-223
Pearl, J, 363-389
Prade, H, 1-21, 23-46, 419-449
Provan, GM, 451-498
Schwecke, E, 47-68
Shafer, G, 323-362
Shenoi, S, 69-85
Shenoy, PP, 319-322
Strat, TM, 391-417
Suermondt, HJ, 283-306
Vanmassenhove, F, 307-318
Vencovska, A, 183-223
Walawender, WP, 69-85
Williams, PM, 225-232
Williamson, RC, 89-158

Approximate reasoning, 47-68
  fuzzy implication operator and method-of-cases
  inference rule, 307-318
Artificial intelligence, 283-306
  belief functions and belief maintenance in, 319-322
Assumption-based truth maintenance system, Dempster-Shafer theory and, 451-498
Bayes networks, adapting connectionist learning to, 261-282
Bayesian methods, probabilistic inference and, 283-306
Bayesian theory, belief functions and, 323-362
Belief function, 23-46
  artificial intelligence and, 319-322
  consonant approximations of, 419-449
  decision analysis using, 391-417
  evidential reasoning and, 391-417
  inner measures and, 323-362
  interactive systems and, 323-362
  local computation axioms and, 225-232
  reasoning with, 363-389
  theory and practice of, 323-362
Belief maintenance, artificial intelligence and, 319-322
Belief networks, probabilistics inference in multiply connected, 283-306
Belief propagation, 261-282
Boltzmann machine, Bayes network and, 261-282
Commonsense principles, maximum entropy and, 183-223
Conditional information, belief functions and, 363-389
Conditioning, 23-46
Connectionist learning, Bayes networks and, 261-282
Contrary evidence, unrenormalized plausibility functions and, 225-232
Convolutions, calculating dependency bounds and, 89-158
Copula, 89-158
Cutsets, multiply connected belief networks with loop, 283-306
Cylindrical extension, 307-318
Decision analysis, belief functions and, 391-417
Decision making, belief functions and, 391-417
Decision tree, belief functions and, 391-417
Defeasible probabilistic models, incremental construction and evaluation of, 233-260
Dempster-Shafer theory
  belief function, 323-362, 363-389, 391-417
  logic-based analysis of, 451-498
Dependency bounds, calculating convolutions and, 89-158
Evidential reasoning, belief functions and, 391-417
Expert systems, 283-306
Fluidized-bed reactors, ranking dimensionless groups and, 69-85
Frechét bound, dependency bounds and, 89-158
Fuzzy arithmetic, 89-158
Fuzzy implication operators, method-of-cases inference rule and, 307-318
Fuzzy integral, 69-85
Fuzzy method of cases, nine forms of operator satisfy, 307-318
Fuzzy number comparison, 159-181
Fuzzy predicate, 1-21
Fuzzy reasoning systems, mathematical model for, 47-68
Fuzzy sets, Optimum method and, 159-181
Independence, belief functions and, 323-362
Inductive inference, maximum entropy and, 183-223
Inexact reasoning, maximum entropy and, 183-223
Inner measures, belief functions and, 323-362
Interactive systems, belief functions and, 323-362
Interval arithmetic, 89-158
Join trees, 323-362
Knowledge and evidence, belief functions and, 363-389
Local computation, Shenoy and Shafer's axioms for, 225-232
Loops, multiply connected belief networks with loop cutsets, 283-306
Lower and upper probability distributions, 89-158
Lower probabilities, belief functions and, 323-362
Markov random fields, 261-282
Material implication, 23-46
Maximum entropy
  inductive inference, maximum entropy and, 183-223
  inevitability of, 183-223
  inexact reasoning, maximum entropy and, 183-223
Multiply connected belief networks, probabilis-

tic inference in, 283-306
Multivalued mappings, belief functions and Dempster's, 323-362
Necessity measure, 1-21
Nonmonotonic reasoning, belief functions and, 363-389
Nonmonotonicity, 23-46
Plausibility functions, local computation axioms and, 225-232
Possibility measure, 1-21
Possibility theory, 23-46
consonant approximations of belief functions and, 419-449
Probabilistic inference, Bayes networks and, 261-282
Probabilistic logic, inevitability of maximum entropy and, 183-223
Probabilistic reasoning, multiply connected belief networks and, 283-306
Probability propagation, belief functions and, 323-362
Probability theory, 23-46
Production rule, 23-46
Propagation algorithm, 47-68
Qualitative ranking, 69-85
Random sets
approximations of belief functions and, 419-449
probability and, 323-362
Random variables, functions of, 89-158
Reasoning system, Dempster-Shafer theory and, 451-498
Renormalization, plausibility functions, 225-232
Resolution principle, 1-21
Resource-bounded reasoning, 233-260
Scale-up design, fluidized-bed reactor, 69-85
Set-theoretic concept of evidence, 47-68
Spurious correlation, 89-158
Statistical inference, belief functions and, 323-362
Theorem proving, Dempster-Shafer theory and, 451-498
Uncertainty, 1-21, 23-46, 47-68
Dempster-Shafer theory and, 451-498
management of, 225-232
reasoning under, 391-417
